			1	0	4	3
Pre-requisite	NIL	Syllabus version				
		1.0				
Course Objectives:						
1. To introduce the core language features of Java and understand the fundamentals of Object -Oriented programming in Java.						
2. To develop the ability of using Java to solve real world problems.						
Course Outcome:						
At the end of this course, students should be able to:						
1. Understand basic programming constructs; realize the fundamentals of Object Orientated Programming in Java; apply inheritance and interface concepts for enhancing code reusability.						
2. Realize the exception handling mechanism; process data within files and use the data structures in the collection framework for solving real world problems.						
Module:1	Java Basics		2 hours			
OOP Paradigm - Features of Java Language - JVM - Bytecode - Java program structure – Basic programming constructs - data types - variables – Java naming conventions – operators.						
Module:2	Looping Constructs and Arrays		2 hours			
Control and looping constructs - Arrays – one dimensional and multi-dimensional – enhanced for loop – Strings - Wrapper classes.						
Module:3	Classes and Objects		2 hours			
Class Fundamentals – Access and non-access specifiers - Declaring objects and assigning object reference variables – array of objects – constructors and destructors – usage of “this” and “static” keywords.						
Module:4	Inheritance and Polymorphism		3 hours			
Inheritance – types – use of “super” – final keyword - Polymorphism – Overloading and Overriding - abstract class – Interfaces.						
Module:5	Packages and Exception Handling		2 hours			
Packages: Creating and Accessing - Sub packages. Exception Handling - Types of Exception - Control Flow in Exceptions - Use of try, catch, finally, throw, throws in Exception Handling - User defined exceptions.						
Module:6	IO Streams and Files		2 hours			
Java I/O streams – FileInputStream & FileOutputStream – FileReader & FileWriter- DataInputStream & DataOutputStream – BufferedInputStream & BufferedOutputStream – PrintOutputStream - Serialization and Deserialization.						
Module:7	Collection Framework		2 hours			
Generic classes and methods - Collection framework: List and Map.
